

Camera Stand kit in HO for GoPro Hero4 Session camera

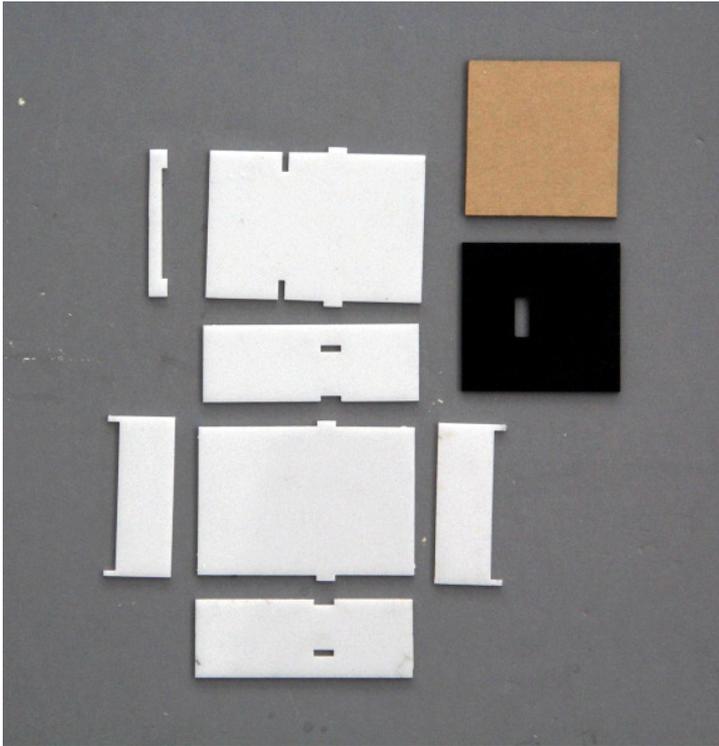

Assembly instructions for camera stand kit

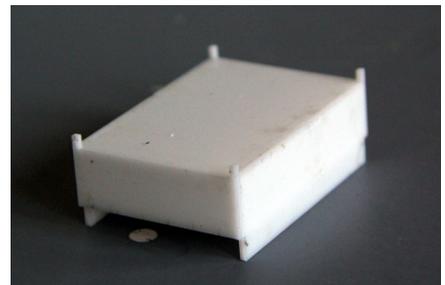

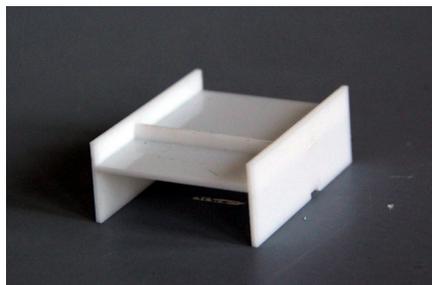

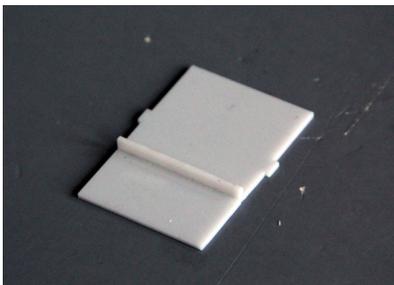

Thank you for buying this camera stand kit. Please take some time to read these instructions before you begin assembling.

This kit is laser cut in white and clear acrylic and is very easy to glue together using Plastruct Plastic Weld or similar glue products.

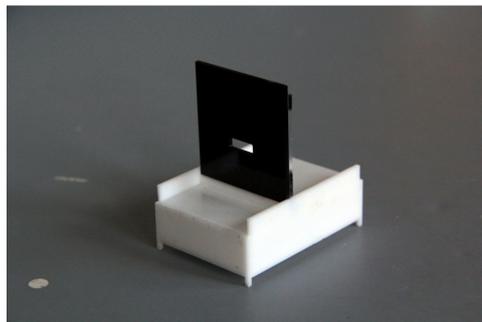

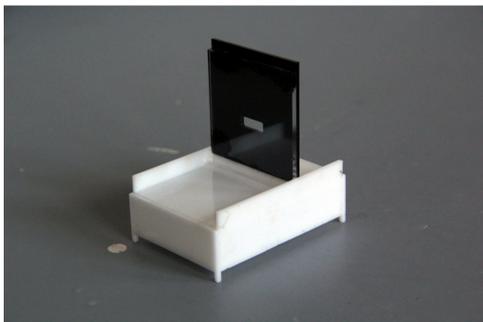

Take your time to identify all parts and lay them out as on the pictures to get an overview of how the kit goes together. Clean all parts for any burrs before you start gluing them together.

Parts overview

Glue the crossbar to the base as shown. Then glue the sides on, and finally the bottom and the end pieces.

Remove the protective paper from the clear acrylic and glue it to the inside of the crossbar, then glue the black window piece onto the clear, resting on top of the crossbar as shown.
