

Modern Capitol One Bank kit in HO scale

Parking lot base and cars not included

This kit includes all building parts laser cut in white acrylic, clear acrylic window glazing and self-adhesive micro-plywood. All parts fit together but may need light sanding in joints for cosmetic reasons. The model needs painting.

Some model building and painting skills are required.

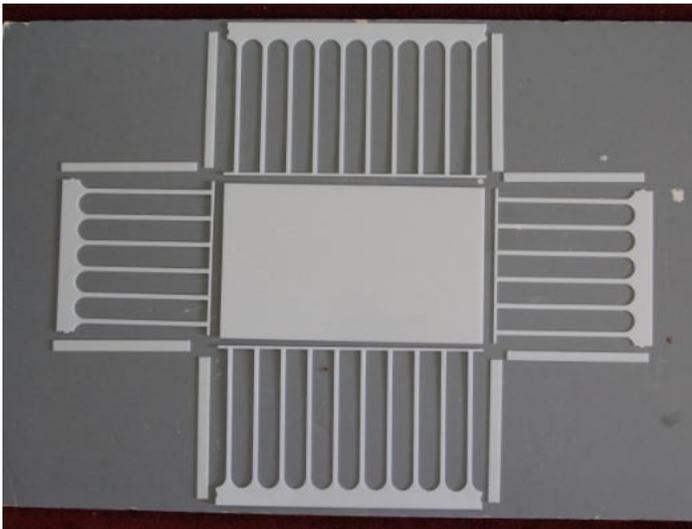

Assembly instructions for Capitol One Bank Building kit

Thank you for buying this modern Capitol One Bank kit. Please take some time to read these instructions before you begin assembling.

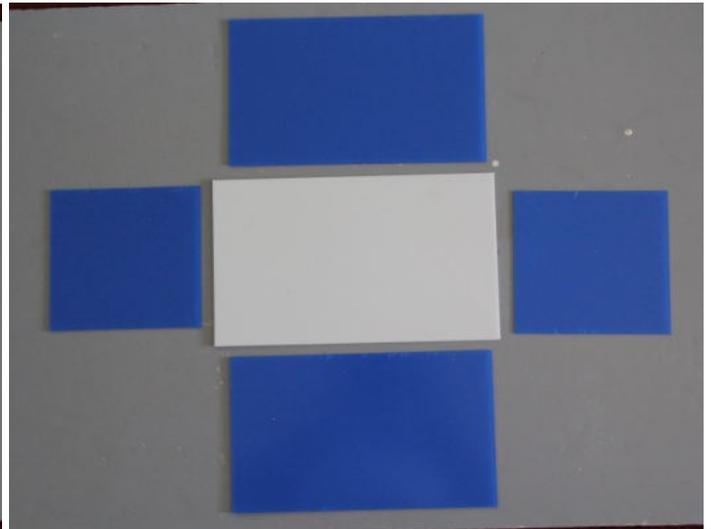

This kit is laser cut in acrylic and self-adhesive micro-plywood and is very easy to glue together using MicroMark Samestuff or Plastruct Plastic Weld glue. The wall parts are tabbed and slotted for easier assembly.

Take your time to identify all parts, lay them out as on the pictures and clean them for any burrs before you start gluing them together.

Handle the acrylic parts with care; they are easier breakable than the usual styrene parts.

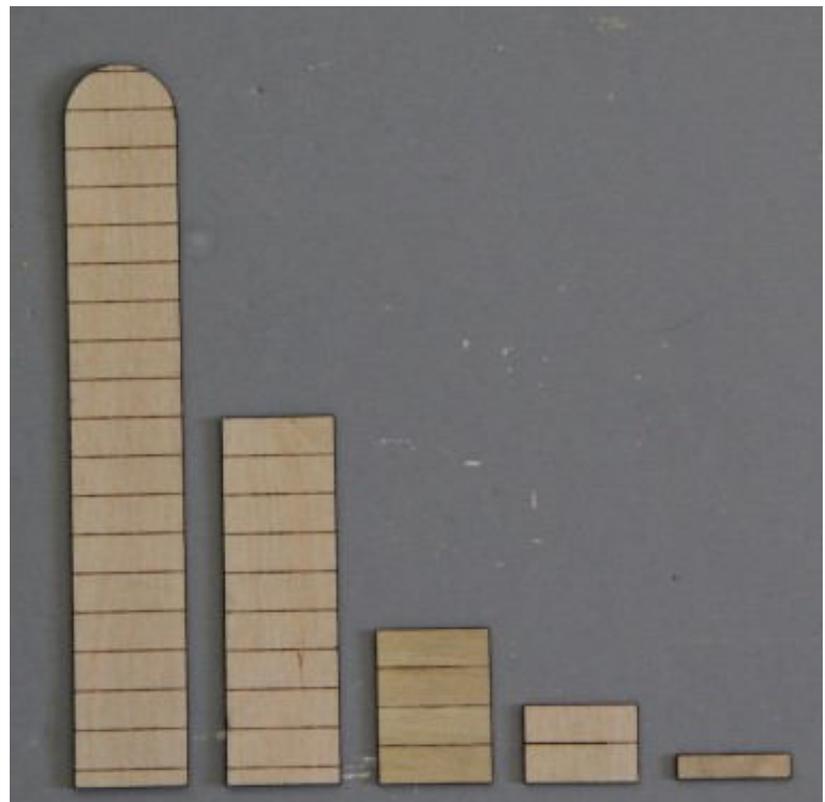

Base and walls

Roof and window glazing

Windows and doors Wall parts:

9 pcs. 5 pcs. 1 pc. 33 pcs. 2 pcs.

Wall logos

Assembly:

Start by gluing the rear and side wall to the EDGE of the base, which is the 1/8" thick solid piece. The 1/16" same size piece is the roof. Glue in the corner strips, the widest ones facing the rear and front.

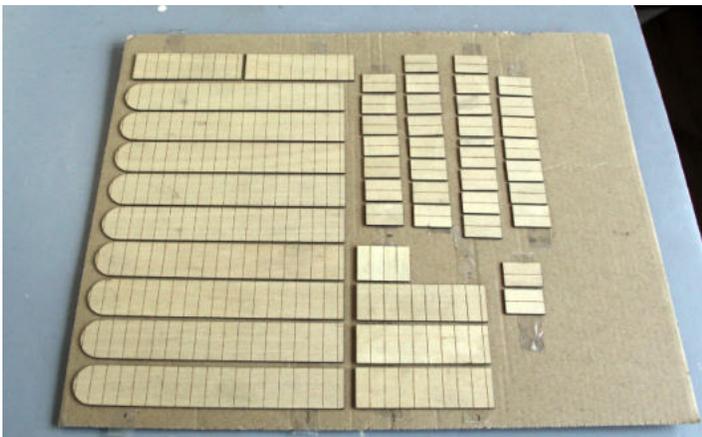

Continue with the remaining walls and corners. Check that the window glazing will fit between the corners before you glue them in.

Painting & finishing:

Remove the protective paper/plastic on one side of the glazing and paint them black (unless you want to make floors and interior details). Cover the inside of the walls with paper and paint the walls a grey primer. When the primer has dried, paint the walls a light grey concrete color.

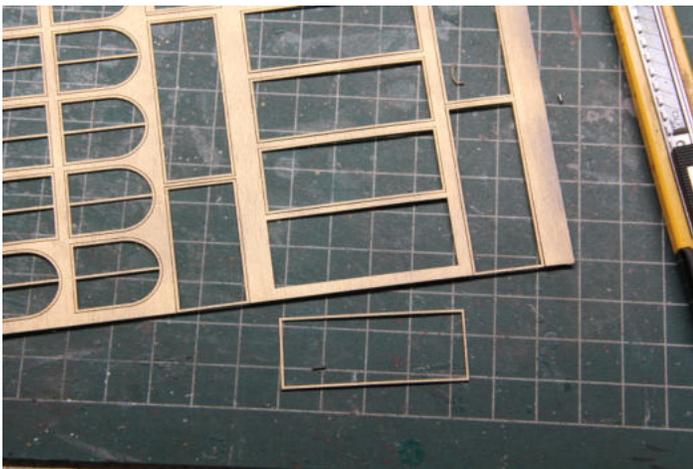

Take a piece of cardboard and mount the wood wall parts with double-sided tape. Paint them dark grey. Leave all the windows on the sprue and paint them a dark brass color.

Carefully break the logo away from the sprue. Place the logos on a piece of cardboard with double-sided tape and paint them white.

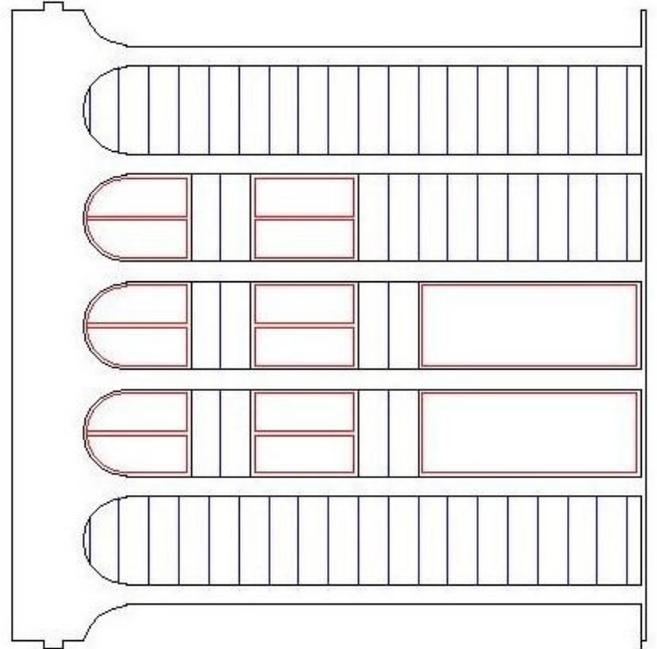

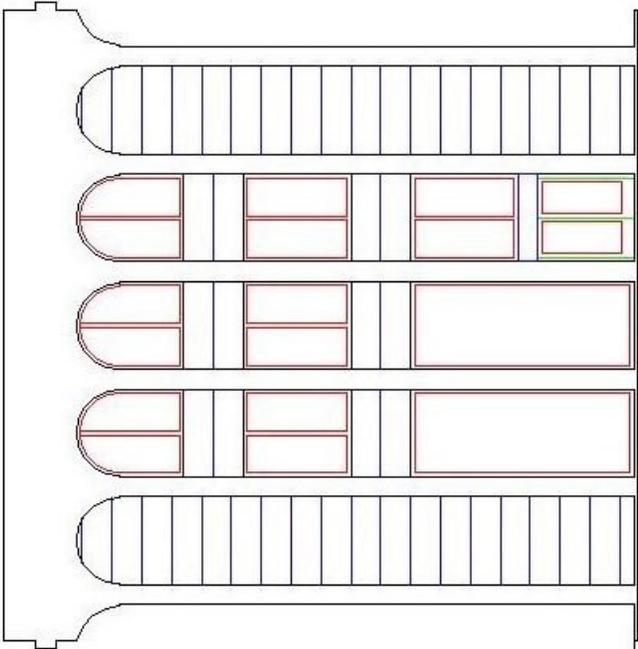

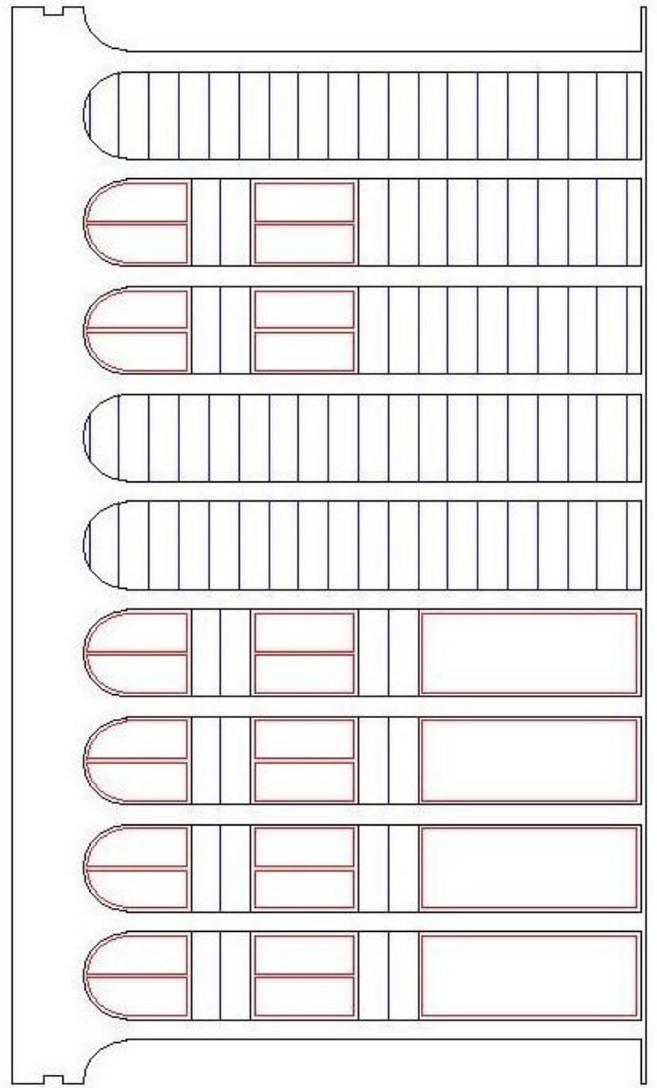

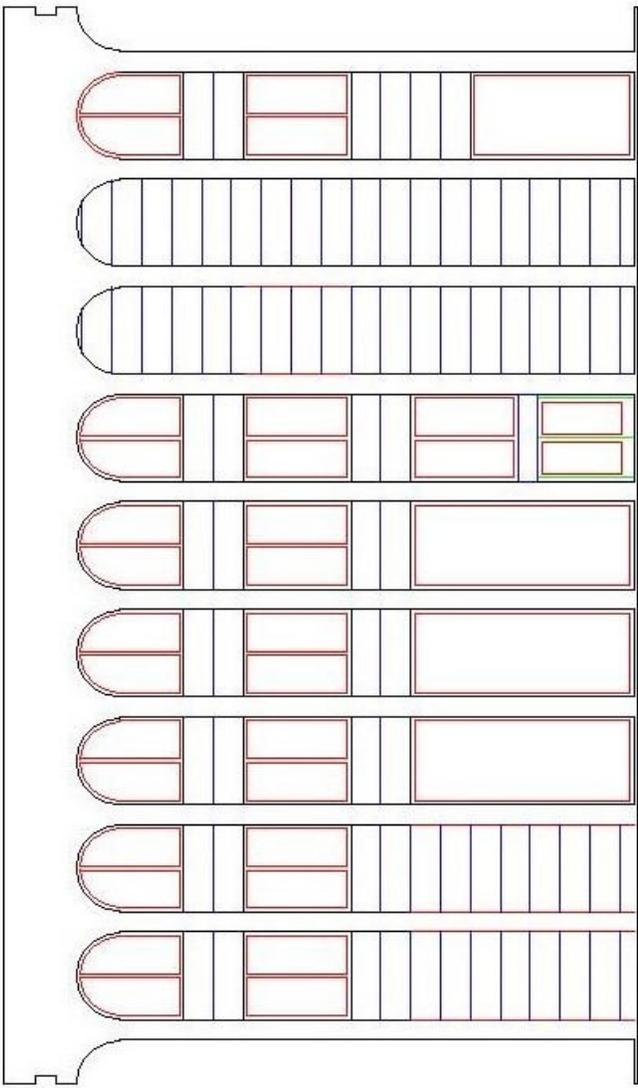

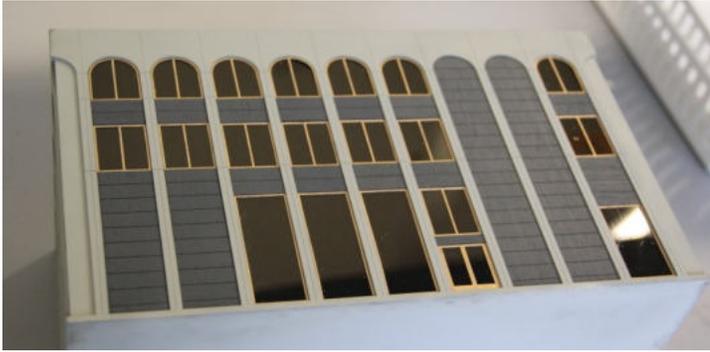

Cut a piece of cardboard and place it in place of the roof, then paint the top of the inside walls. Paint the roof flat black or dark grey. When the paint has set, glue in the glazing clear side out.

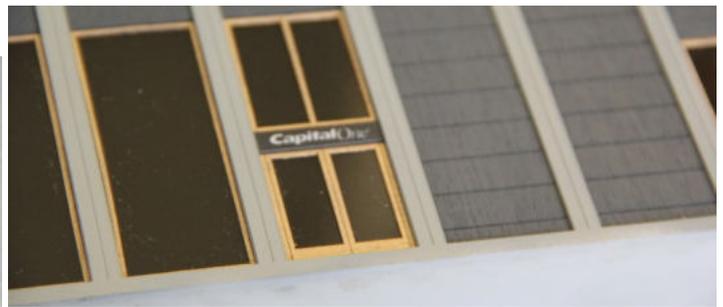

Carefully cut the window frames from the sprue with a sharp hobby knife. Peel the paper from the adhesive side and mount the windows and wall pieces on the glass, starting from the top. Be very careful that the pieces line up right before you drop them in place, once the adhesive touches you can't remove the part without damaging it.

You can see the parts distribution on the following page, left to right: Left side, Front, Right side, Rear.

Glue the logos on top of the front and left side as shown. Glue with Woodland Scenics Scenic Cement, this dries up clear and flat. Apply a very thin layer with the tip of your little finger.

Cut the logo decals out with a sharp hobby knife and mount them over the doors. Drop the roof in place, you do not need to glue.

Enjoy your Office Building on your layout.

Paint used on this model:

Model Master 1730 Flat Gull Gray
Model Master 1323 Gunship Gray
Testors 1249 Flat Black spray

Humbrol 54 Bronze (I used 16 Gold, but Bronze is more correct for the prototype)
Floquil F110011 Reefer White
