

Modern Manufactured Home kit in HO scale

This kit includes all building parts milled in white styrene plastic, laser cut acrylic, wood and clear window glazing. All parts fit together but may need light sanding in joints for cosmetic reasons. The model needs painting.

Some model building and painting skills are required.

Manufactured by Custom Cuts by

Assembly instructions for Manufactured Home

Thank you for buying this Manufactured Home kit. Please take some time to read these instructions before you begin assembling.

This kit is milled in styrene plastic and is very easy to glue together using Plastruct Plastic Weld or similar glue products. The wall parts are tabbed and slotted for easier assembly. Take your time to identify all parts, lay them out and clean them for any burrs before gluing them together.

Floor, walls, and roof in styrene and acrylic

Laser cut wood parts:

Roofline & bottom sill trim strips,
self-adhesive

Skirts, self-adhesive

Shutters, self-adhesive

Stairs & front porch

Windows & doors, self-adhesive

Assembly

Thank you for buying this Manufactured Home building kit. Please take some time to read these instructions before you begin assembling.

This kit is milled in styrene plastic and laser cut acrylic and wood, and is very easy to glue together using Plastruct Plastic Weld. Take your time to identify all parts, lay them out and clean them for any burrs before gluing them together. Handle the acrylic pieces with care, they break easier than styrene.

You should paint the windows & doors, the shutters and maybe the trim strips when they are still on the sprue and wait to put them on the building until it is painted.

Start by assembling the four walls as shown. You may need to sand the corners to make them smooth. Glue on the roof pieces.

Mount the trim strips along the roof line on the front and rear walls (or wait until later).

Glue the columns to the bottom of the floor. Glue the bottom trim strips all around the walls, leaving a lip of 0.04" (1mm) to cover the skirt joint.

Test fit the house on the floor. Cut the windows and doors out of the sprue and clean them for any burrs.

Cut the stair pieces from the sprue and glue them together as shown

Mask off the windows on the inside with masking tape. Mask off the trim strips and paint the building. Mount the shutters (still on the sprue) on a piece of cardboard and paint them. When dry, cut the shutters out of the sprue and mount them on the wall. They are self-adhesive.

Mount the roofing material, Peel only a small part of the back paper and position the roofing using the peak of the roof as the baseline, then carefully peel the rest as you firmly press the self-adhesive roofing in place. Cut off excess along the edges with a sharp hobby knife. Give the almost completed building a coat of Testors Dull Cote.

Mount the window glazing inside the wall. When the glue has set, carefully mount the window frames. These are self-adhesive; you just need to remove the backing paper.

Enjoy your Manufactured Home on your layout.
